## Hydration assemblies and valves

Nalgene knows what a hydration reservoir should and shouldn't do, which is how they've built their reputation for tough, taste-free quality. Because a cool drink of water should be just that. Bladder features include:

- All bladders use only propriety Nalgene materials for maximum strength and minimum aftertaste
- Quick connect hose assembly means easy-on, easy-off when you're swapping out components or filling bladder
- "Bite Me" angled bite valve with shut-off mechanism positions the hose where you want it and prevents leakage
- Insulating sleeve keeps your favorite drink colder longer
- Generous hose length accommodates virtually any pursuit and any level of activity

Available in two materials:

### TPE

- Reliably tough and beautifully versatile for the die-hard adventurer
- Special polymer does away with nearly all plastic odor and taste
- Strong soft-plastic construction stands up to wear and tear while doing away with annoying crinkly noise
- One-piece seamless tubular design means less chance of leakage or breakage
- Blue

### CXC

- The ultimate bladder for those who prefer their liquids to speak for themselves
- Unique formula means zero plastic taste or smell
- Proprietary plastic polymer was originally developed for military use
- Super tough construction results in maximum abrasion resistance
- Clear
