## Re-useable, stainless steel oil filters

CompFlow is the world's first affordable, stainless steel reusable oil filtration system. Constructed from Swiss made, precision stainless steel filter cloth, CompFlow will filter particles as small as 35 microns and is the best protection you can buy for your 4-stroke engine, end of story.

Today's 4-strokes need lots of oil changes and CompFlow makes it simple and affordable. No more going to the store to buy oil filters, just rinse the filter with a little solvent or contact cleaner and pop it back in, quick and easy. One CompFlow filter will last the life of your bike, and provide protection that far exceeds standard paper oil filters.

Popular applications also include a super trick black anodized billet aluminum oil filter cover. Who says oil filters can't be fun?
